

HOW TO CREATE AFFORDABLE LARGE FORMAT PRINTS

Step 1

Download a vector program

Free - Inkscape

Not free - Adobe Illustrator

Step 2

Set up artboard

Set it up at 841mm x 1189mm (a0) for now...

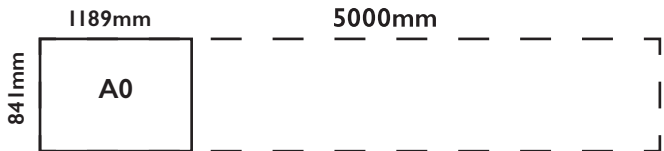

Step 3

Create artwork

You are limited to 841mm high but you can print up to 5 metres in length.

You can create anything but it does have to be black and white if you want it to be cheap.

Perfect for long sentences or adverts >>>>>>>>>>>>

Step 4 Print off your artwork

Find your nearest Service Graphics. They are a printing chain and have offices in all of the big cities around the UK. They charge **£1.20 for an A0 black and white print off.**

Using this method you can cover a billboard for £25.

Step 5 Paste and Application

Use wallpaper paste as it is quick and easy. Paste the wall 1st and then unroll the paper onto the paste. If the police say anything tell them its for an art project and you intend to take it down.

If a member of the public says anything tell them that you're just doing your job.

A hi viz jacket helps! Good luck - any questions @fokawolf or drfokawolf@gmail.com
